

# STINGER LTD

**SIMPLY THE BEST**

## Used Chassis Specifications for Model 1500 & 2500 Stingers

Some models that have worked well in the past are the International S-4900, the Ford F-800 & GMC TopKick.

Some things to look for:

- Feedlot core radiator
- More than 200 horsepower
- Minimum spring weights: 12,000 lbs.-front and 24,000lbs.-rear (20,000 for slide-off)
- 330" of frame rail behind the front bumper

- |               |   |
|---------------|---|
| A = 125"      | Will be adjusted to set proper tilt height depending on frame heights |
| B = 91"       |   |
| C = 40" - 44" | Standard truck frames are 38" - 40"                                   |
| D = 40" - 44" | Standard truck frames are 38" - 40"                                   |
| E = 280"      | Single axle (Tandem axle trucks this must be the rear most axle)      |

All dimensions are approximates and we can work around many small variations, please call to discuss specific trucks you have in mind.
