STINGER STACKER 6500

VERSATILITY, PROFITABILITY, LONGEVITY

The Stinger Stacker 6500 gives unmatched weight distribution, performance and versatility compared to any other bale stacker on the market. Stack bales on edge or on twine. Haul round or square bales and unload 9 to 13 bales in less than 4 seconds, when road siding. The Stinger Stacker 6500 is the only single axle SP bale stacker that does not exceed axle or tire ratings. The long wheel base and center mounted operators cab gives unmatched ride quality for those long days and nights.

STINGER STACKER 8500

INDUSTRY LEADING PERFORMANCE & CAPACITY

The first commercial bale stacker designed specifically for the expanding market of Ultra Dense bales. The Stinger Stacker 8500 combines the most popular and proven features of Stingers of the past with the added performance and design to handle more bales at less cost than any other bale wagon in the world. Increased capacity, increased flotation, increased traction, speed, and horsepower. The Stinger Stacker 8500 is simply like no other and stands in a class of its own.

STINGER CUBE-LINE 4010 WRAPPER

Any job worth doing requires the right set of tools. Hay production is no different. The Stinger Cube-Line 4010 is another tool that lets you, the producer, take control of your harvest before Mother Nature ruins the quality of your product. The Stinger Cube-Line 4010 is the best insurance policy no matter what size hay operation you run, from 250 acres to 2500 acres. Bale one day sooner rather than two weeks late. End the days of rain damaged hay on your farm. Take control, and beat Mother Nature. Feed and sell the best quality hay year round and increase your profits.

Just saving 250 Tons from being rained on during a single cutting can net you \$30,000 more profit with the Cube-Line 4010. How many tons of hay did you lose to Mother Nature last season?
